

We're passionate about what we do

At AEIOU, our team loves what they do and they're proud of the children they support. We are a for-purpose organisation, committed to research and ensuring our program offers quality and excellent value for local families.

"AEIOU has exceeded our expectations by far, giving Ivy opportunities we never thought possible. Without fail, her speech and communication progress has been the biggest achievement to date. She has also had help with toilet training and learned self-help skills. We are very optimistic about her future. We truly believe anything is possible and we credit AEIOU for helping Ivy in her journey." AEIOU parent

Creating a lifetime of opportunities for children with autism

Early intervention therapy and support

How AEIOU Foundation can help

Effective early intervention gives children with autism the best chance to reach their potential, fostering independence, confidence and inclusion.

AEIOU offers an evidence-based program for children aged 2-6 years, with nine centres conveniently based across Queensland and one in Adelaide. With full-time therapists who specialise in autism across a range of disciplines, AEIOU provides:

At AEIOU every child with autism is different and every child is recognised as an individual, supported in a warm, caring and naturalistic environment. Based on a long day care model, children are supported to develop social and play skills, along with the core developmental goals identified by parents and carers.

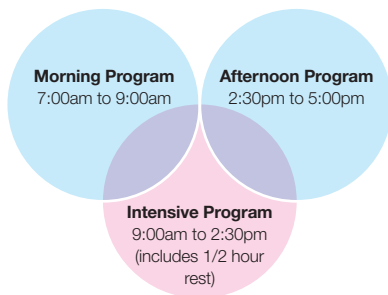

Your child will have access to:

- A minimum of 20 hours of intensive autism-specific therapy each week
- A high staff-to-child ratio
- Individualised plan
- Individual and group therapy

Your skilled autism team comprises:

- Program Manager
- Service Manager
- Speech Pathologist
- Occupational Therapist
- Behaviour Therapist
- Early Childhood Teacher
- Learning Facilitators

AEIOU's program is underpinned by a transdisciplinary model, which means our team is capable of working within their own profession, and have the skill to work across other professions, supporting children with a consistent approach to therapy.

The benefits of the AEIOU program

Early intervention for children with autism leads to improved outcomes, including:

- Increased ability to learn
- Increased independence
- Increased social skills
- Improved daily living skills

At AEIOU, you become part of the family and can access:

- Our NDIS Support Coordinator – take the stress out of the NDIS
- Parent training and workshops
- Home visits
- School transition support

Your focus is our focus. We specialise in functional communication, behaviour support, social skills and independent living skills, including toilet training and mealtime support.

The NDIS and AEIOU

AEIOU is an NDIS-approved service provider for autism-specific early intervention. We provide regular information sessions and you can access support and advice from our NDIS Support Coordinator at any time.
